Dawn,
Great to hear this!
Good luck with the pups.....
Jack

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

I have not talked to anyone outside the Region regarding developing an inhalation value for the compound of interest. I do believe, however, that ATSDR has been in contact with Chris Weis, or maybe they were just discussing that as an option. Jack might know better than I about that.

Dawn,

I called your office and your voice on voicemail sounds great! Congratulations.

Unfortunately, it wasn't just a social call. I am following up on Jack K's request for help in developing an air comparison value for 4-MCHM.

I spoke with Vince Cogliano and, although he reviewed the Interagency Group's work on drinking water and is willing to review efforts on inhalation, he says he is not the point of contact. He suggested Greg Sayles (ORD, Cincinnati) and/or Chris Weis (NIEHS).

Management here is willing to formally ask for their help on inhalation, but I wanted to check with you and Jack first, in case you have been in contact with either of them recently.

Janine
